Commitment to Net Zero: 2050

ihavesignal limited is committed to achieving Net Zero emissions by 2050, aligning with the UK government's Net Zero target and the global effort to limit warming to 1.5°C as outlined in the IPCC's AR6 report and the COP26 agreement. We recognise the urgent need to reduce greenhouse gas emissions and are taking action to minimise our environmental impact. This Carbon Reduction Plan outlines our strategy and progress towards achieving this goal.

CURRENT 12-MONTH EMISSIONS

139.63 tonnes CO2e Total Emissions			
Scope	Description	Emissions (tCO2e)	%
Scope 1	Direct emissions	127.36	91.2%
Scope 2	Energy indirect	0.10	0.1%
Scope 3	Other indirect	12.17	8.7%
Total		139.63	100%

Emissions Distribution

PROJECTED EMISSIONS REDUCTION

Reduction Method: Compounding annual reduction of 4.2% per year

Near-Term (5 Years): By 2031, our projected emissions are **112.85 tCO2e**, representing a **19.2% reduction** from our current baseline using a compounding annual reduction approach of 4.2% per year.

Net Zero Commitment: By our net zero commitment year of **2050**, emissions are projected to reach **50.24 tCO2e**, achieving an overall **64.0% reduction** from our baseline through consistent year-on-year reductions.

YEAR-BY-YEAR EMISSIONS TO NET ZERO 2050

Year	Visual	Emissions (tCO2e)	Reduction %

CARBON REDUCTION TARGETS

ihavesignal limited has established formal, quantifiable Greenhouse Gas (GHG) emission targets to drive our transition towards a Net Zero economy. The strategy includes both immediate, actionable steps and a clear, long-term commitment.

Near-Term Targets (5 Years)

Emission Scope	Target Type	Target Year	Quantifiable Target
Scope 1 & 2	Absolute Reduction	2031	An absolute reduction of 19.2% in total Scope 1 & 2 emissions (tCO2e) (from 127.46 to 103.01).
Scope 3	Absolute Reduction	2031	An absolute reduction of 19.2% in total Scope 3 emissions (tCO2e) (from 12.17 to 9.84).

(Baseline Year for all targets is 2026, with the current Reporting Year being 2026.)

Long-Term Target (Net Zero)

- Goal: Achieve Net Zero emissions across all Scopes by 2050.
- Method: This involves reducing absolute emissions by at least 90% across Scope 1, 2, and 3.
- Residual: Any remaining residual emissions will be neutralised through high-quality carbon removal projects.

CARBON REDUCTION INITIATIVES

To meet its ambitious Near-Term and Long-Term Carbon Reduction Targets, ihavesignal limited is implementing a comprehensive strategy focusing on three core areas: Employee Engagement, Supply Chain Collaboration, and Operational/Technical Enhancements.

1. People and Culture (Employee Engagement)

- **Mandatory Training:** Implement mandatory Carbon Literacy training for all employees to help them understand and reduce their carbon footprint at work and home.
- **Champions Network:** Establish a cross-departmental "Sustainability Champions" network to advocate for initiatives, drive engagement, and collect ideas.
- **Integration:** Embed sustainability principles into the onboarding process for all new hires.
- **Behaviour:** Launch regular Behavioural Change Campaigns promoting energy-saving and celebrating achievements.

2. Partners (Supply Chain Engagement)

- **Formal Programme:** Launch a "Sustainable Supplier Programme" to engage key suppliers, particularly those contributing to specific Scope 3 categories.
- **Mandatory Disclosure:** Integrate mandatory carbon emissions reporting (Scope 1, 2, and relevant Scope 3) into new and renewing supplier contracts.
- **Development & Support:** Offer resources and guidance to strategic suppliers on developing their own carbon reduction plans.
- **Procurement:** Revise the procurement policy to prioritise suppliers with verified carbon reduction targets and sustainable certifications (Green Procurement Policy Integration).

3. Operations and Technology (Technical Enhancements)

- **Scope 1 (Fleet):** Phased transition of the company fleet to Electric Vehicles (EVs) with necessary infrastructure investment.
- **Scope 2 (Energy):** Switch to 100% renewable electricity tariffs and invest in energy efficiency upgrades like LED lighting and smart HVAC controls.
- **Scope 3 (Travel):** Implement a "travel hierarchy" prioritising virtual meetings and rail, and reducing air travel by a set percentage.
- **Scope 3 (Commuting):** Promote flexible/remote working and offer incentives for public transport, cycling, and walking.
- **Scope 3 (Waste):** Implement a "Zero Waste to Landfill" policy and explore circular economy solutions.

DECLARATION AND SIGN OFF

This Carbon Reduction Plan has been completed in accordance with PPN006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate UK Government GHG Conversion Factors (Year 2025) for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
